

# Telecommunications & Technologies International, Inc.

## “World Network Equipment Industry Recovery 2002-2003”

World Network Equipment Industry Recovery 2002-2003 available in print or electronically at \$149.95 per copy or at reduced prices for multiple copies.

After two years of devastating retrenchments, the telecom/IT industry will not recover quickly or easily, but this original research shows that a new industry is emerging, with opportunities for network equipment suppliers, service providers, enterprise-network operators, government and other customers. The study brings together information and insights from dozens of senior finance officers, network planning executives and senior market development managers, representing a wide spectrum of leading service providers in the U.S. and internationally. Profit from the knowledge and experience of these experts and discover opportunities for your company in this critical analysis of insider perspectives, market economics, technology trends and public policy issues.
